

THE HARDENED EDITION v2.0.1

Inter Tight

100% OFFLINE

JetBrains Mono

Air-gapped architecture by design.

Inter Tight

ZERO-KNOWLEDGE

JetBrains Mono

We cannot see your data. Ever.

Inter Tight

MILITARY-GRADE

JetBrains Mono

AES-256-GCM / Argon2id KDF.

NO SERVERS = NO BREACHES

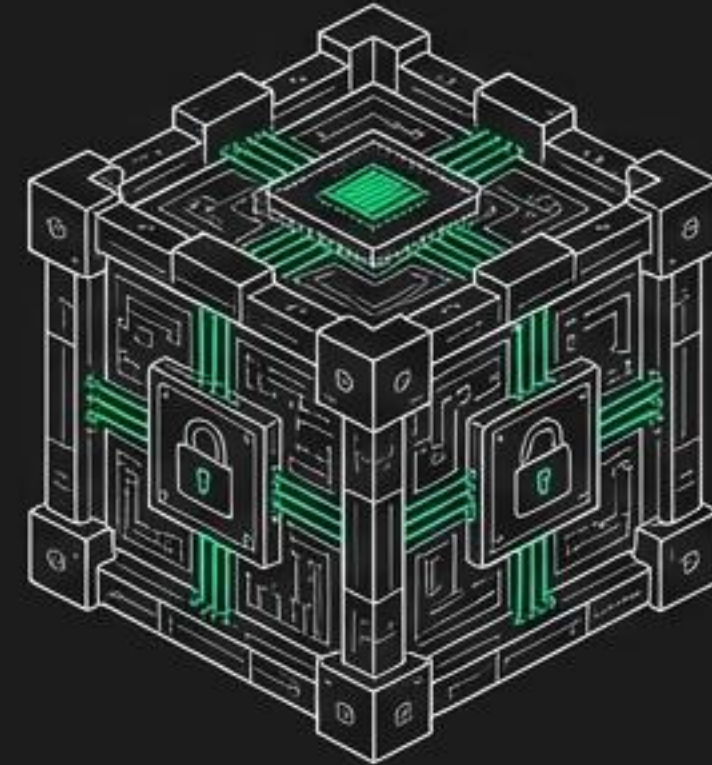

Zero-Trust Sovereignty Model

THE CLOUD RISK

- Centralized Failure Point
- Third-party access possible
- Vulnerable to mass API hacks

AEGIS SOVEREIGNTY

- 100% Offline Architecture
- Local Storage Only
- Master Key never leaves device

“Privacy by Design: Unlike cloud-based managers, your master key never leaves your device.”

THE MATHEMATICS OF IMPOSSIBILITY

Core Security Architecture Specs

DATABASE LAYER

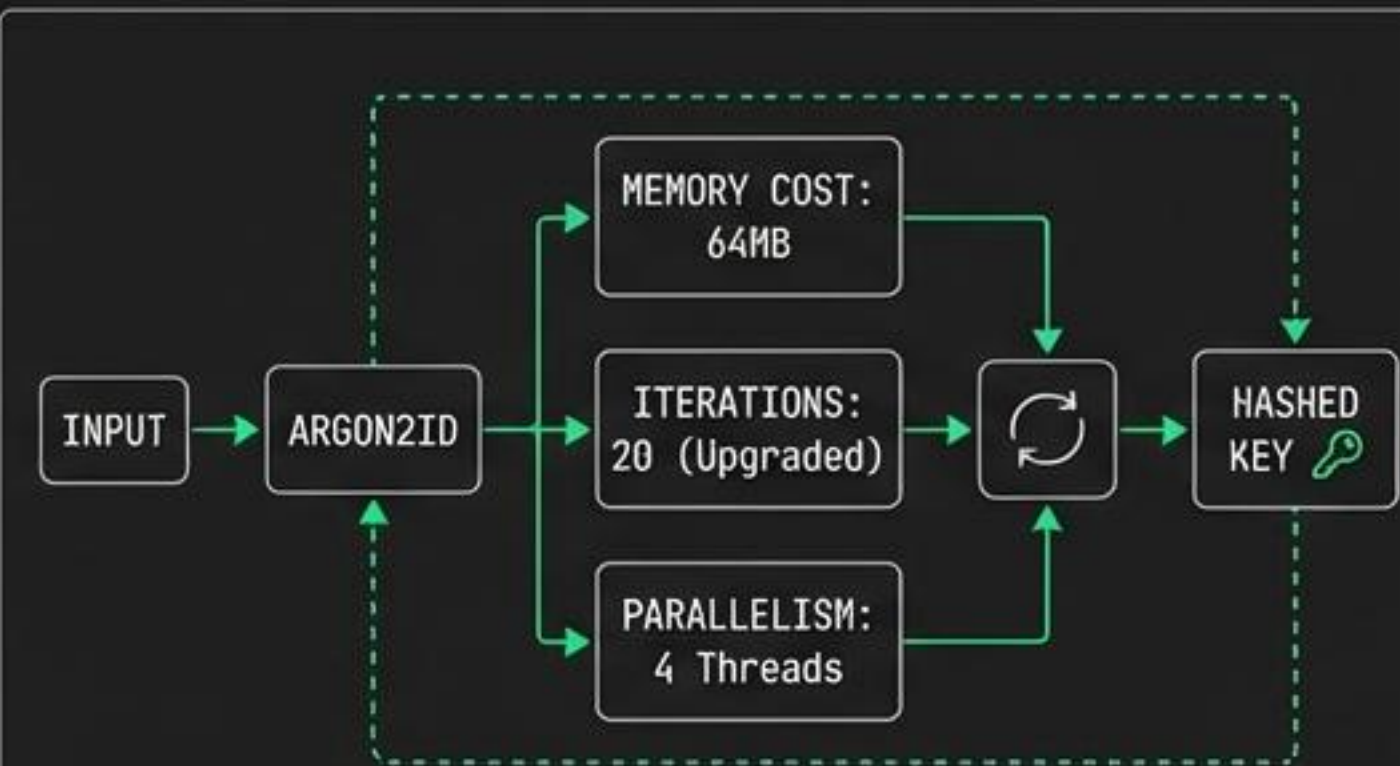

SQLCipher Engine
Full database-level encryption
File is opaque blob without key

ENCRYPTION STANDARD

AES-256-GCM
NIST Approved
Authenticated Encryption

KEY DERIVATION (KDF)

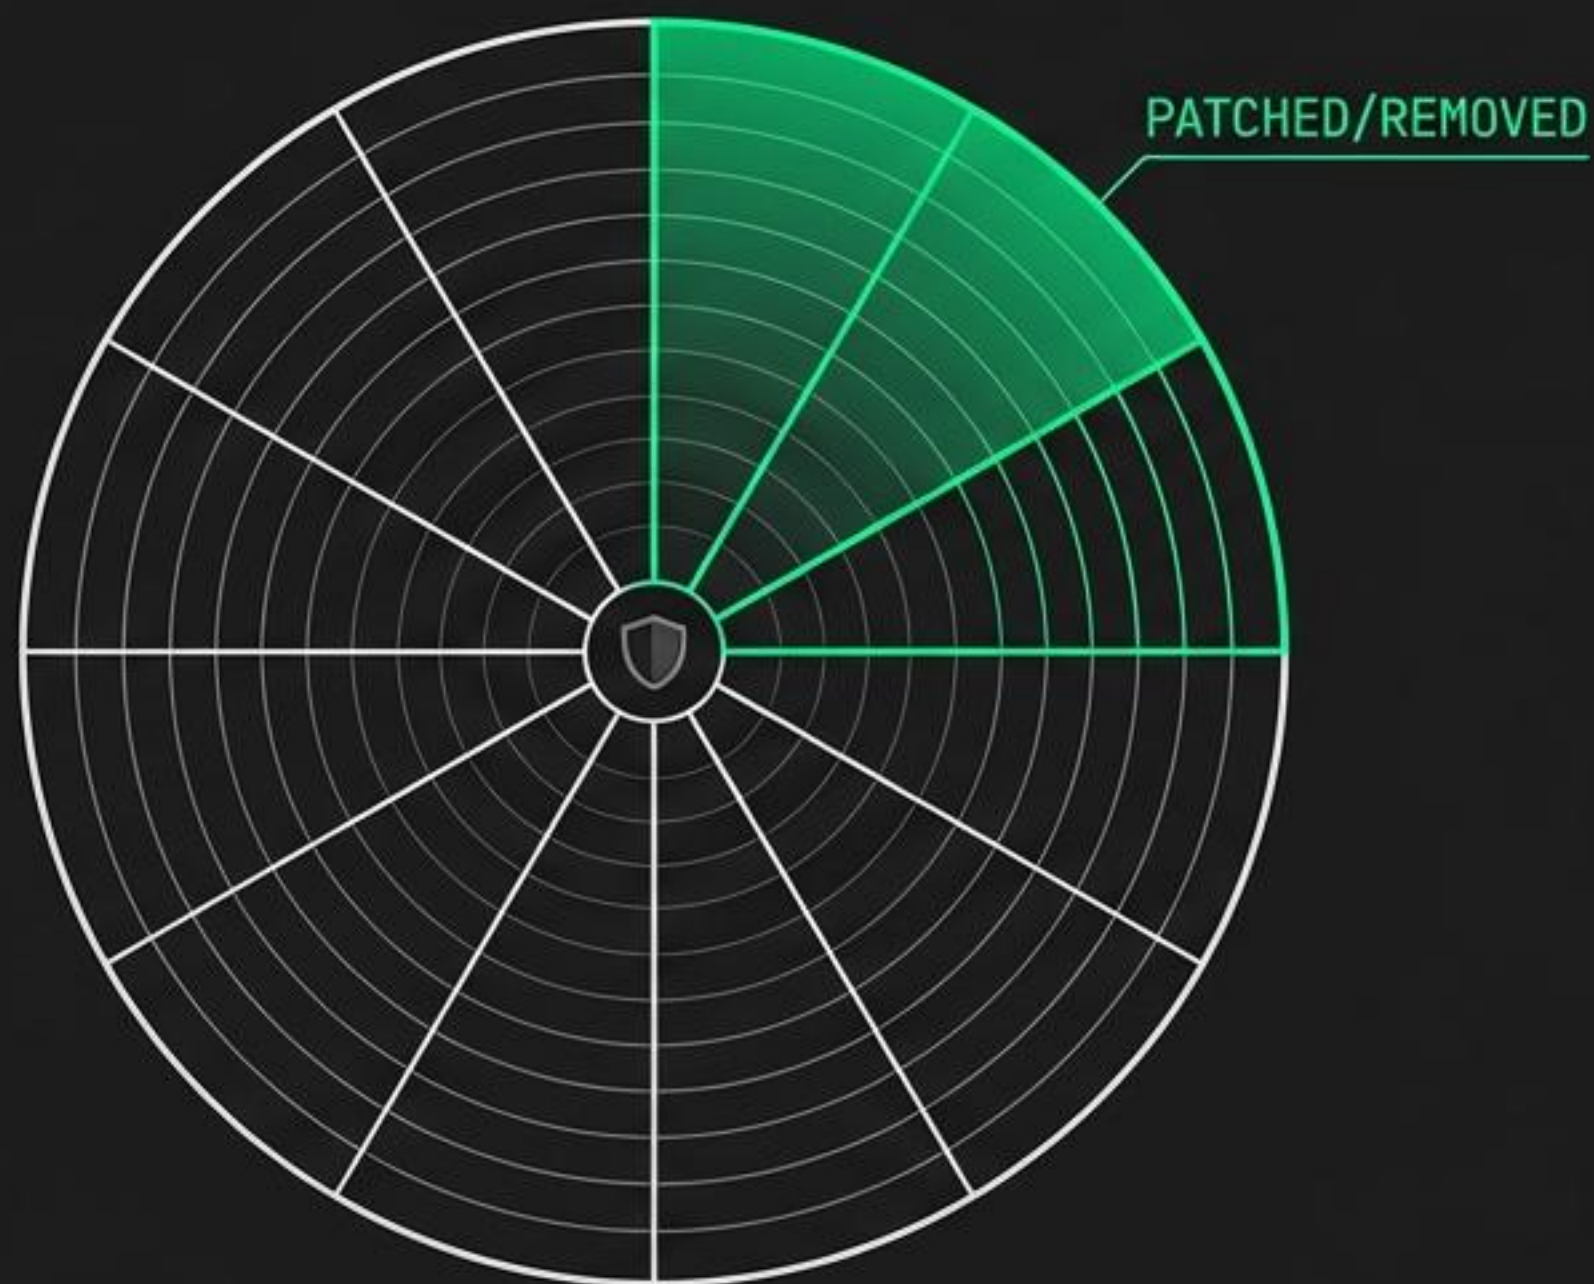

Argon2id Algorithm	Iterations: 20 (Upgraded)
OWASP 2024 Compliant	Parallelism: 4 Threads
Memory Cost: 64MB	GPU-Resistant Hashing

JetBrains Mono: Mathematical complexity renders brute-force attacks computationally infeasible.

v2.0.1 HARDENED EDITION

Active Attack Surface Reduction

SHIELD ANALYSIS

HARDENING ACTIONS

1. NAMED PIPE REMOVAL

Removed: `\\.\pipe\aegis-vault-pipe`
Eliminates browser extension vector.
Prevents local privilege escalation.

2. HARDWARE BINDING

Keys physically locked to unique Hardware ID.
Database cannot be opened on copied device.

3. CODE OBFUSCATION

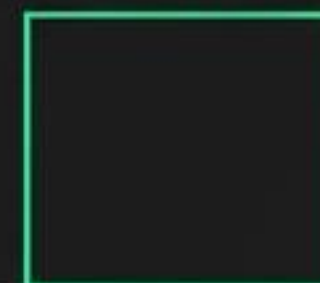

Source code protected against reverse engineering.

4. SECURITY SCORE INCREASE

v1.0.0: 85/100

v2.0.1: 98/100 (Current)

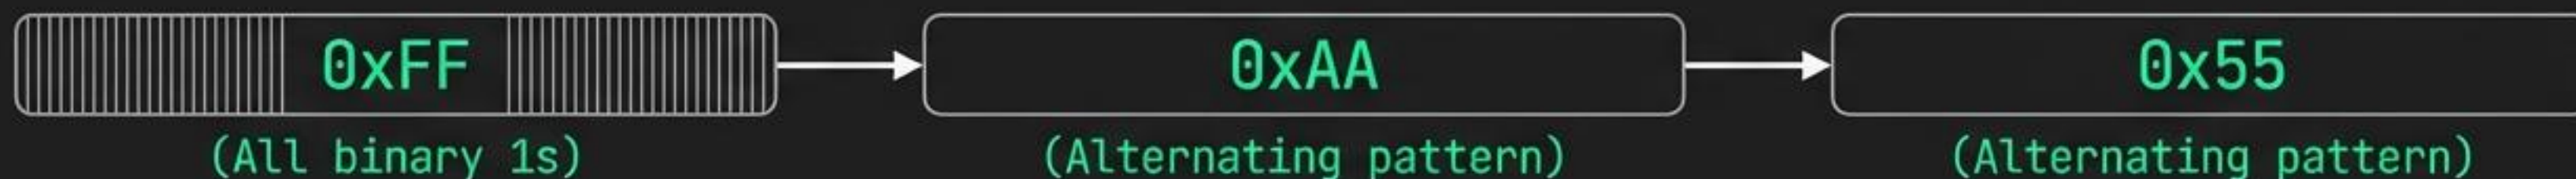

ANTI-FORENSICS & MEMORY PROTECTION

VIRTUALLOCK TECHNOLOGY

Prevents critical keys from swapping to disk.
Protects against cold-boot attacks and forensic disk analysis.

TRIPLE-WIPE PROTOCOL

Upon exit or lock, sensitive memory addresses are overwritten three times.
Ensures total destruction of residual data.

BRING YOUR OWN CLOUD (BYOC)

Convenience without Compromise

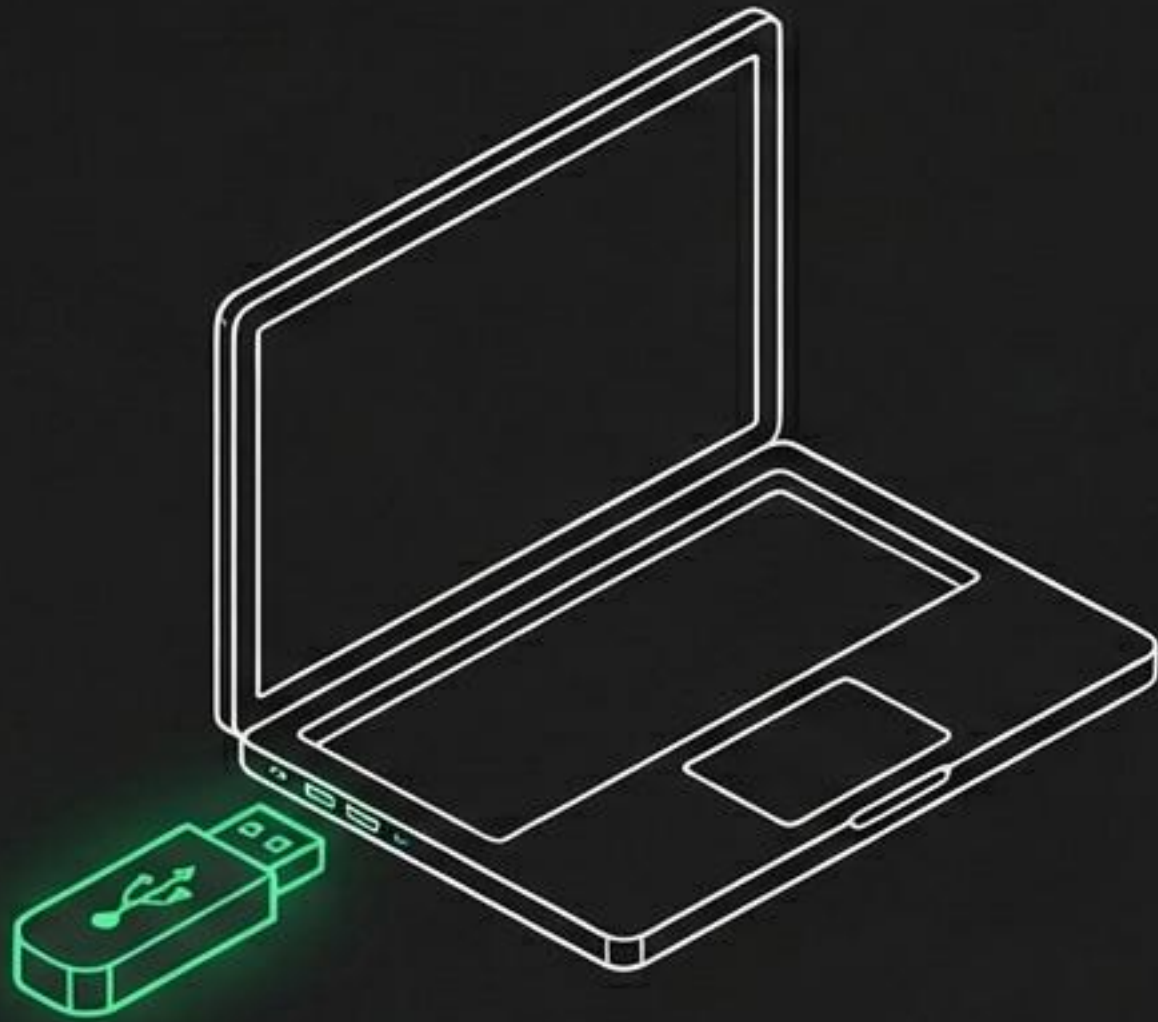

Zero-Trust Sync:

Data is encrypted LOCALLY before network transmission.
Cloud provider sees only meaningless random noise.
No Aegis servers involved. You control the API keys.

ZERO-FOOTPRINT PORTABILITY

For IT Professionals and Nomads

- ☒ **NO INSTALLATION REQUIRED**
Runs directly from EXE or extracted ZIP.
- ☒ **NO ADMIN RIGHTS NEEDED**
Bypass corporate install restrictions.
Run on guest machines.
- ☒ **CROSS-PLATFORM ENGINE**
Windows 10/11
macOS 10.13+
Linux (AppImage/Deb)
- ☒ **LIFETIME LICENSE TRAVELS WITH YOU**
Your vault and license live on your removable media.

THE POWER USER EXPERIENCE (CLI)

Scripting, Automation, and Headless Access

Aegis Interface

AWS Root (Login)

SSH Keys (Note)

GitHub (Login)

Terminal/Command Prompt

```
> .\cli.bat list
```

ID (Short)	Category	Title
------------	----------	-------

a1b2c3d4	Login	AWS Root
----------	-------	----------

e5f6g7h8	Note	SSH Keys
----------	------	----------

```
> .\cli.bat get a1b2c3d4
```

Title: AWS Root

Username: admin

Password: [HIDDEN]

Secure Input
Handling:
Passwords never
logged in shell
history.

Full Argon2id
encryption
parity with
desktop app.

USER EXPERIENCE WITHOUT COMPROMISE

3D CARD VIEW

Secure visualization of payment details
with flip-to-reveal CVC.

SECURE NOTES

Encrypted storage for sensitive files,
SSH keys, and documents.

BIOMETRIC UNLOCK

Windows Hello & TouchID integration.
Hardware-backed auth.

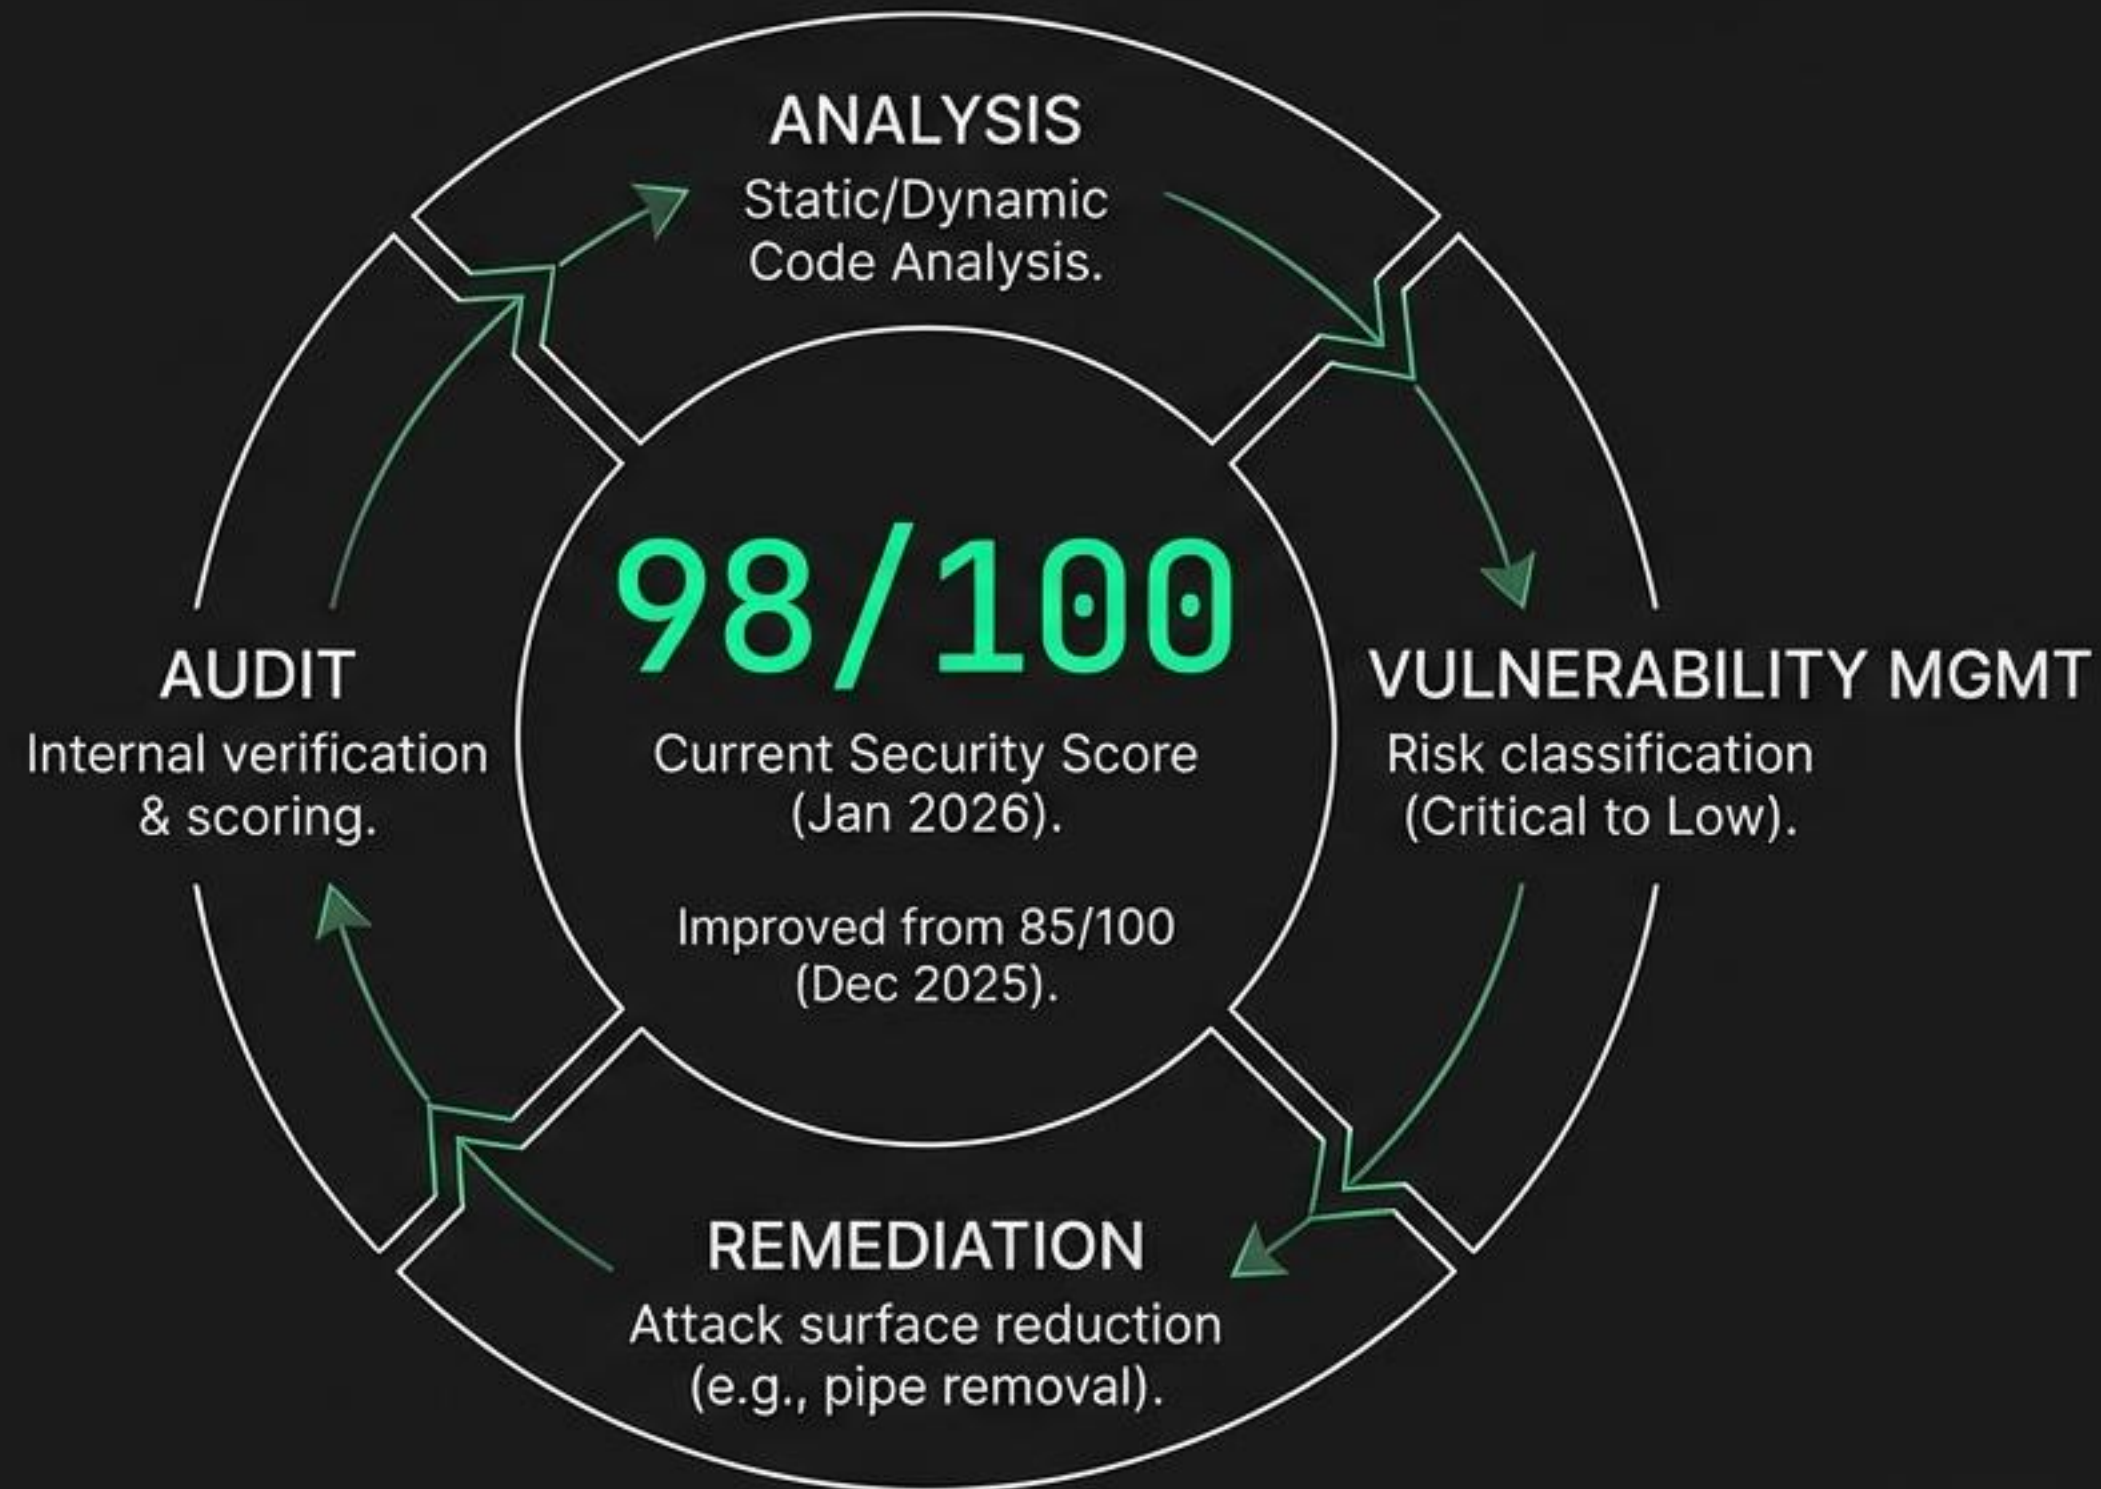

GENERATOR & AUDIT

Cryptographically secure random generation.
Password strength analysis.

THE SECURITY LIFECYCLE

Continuous Verification Process

COMPETITIVE LANDSCAPE

Features	Aegis Vault	KeePassXC	Bitwarden	1Password
HARDWARE BINDING	YES (Unique ID)	NO	NO	NO
MEMORY PROTECTION	YES (VirtualLock)	PARTIAL	NO	PARTIAL
OFFLINE-FIRST	100%	100%	Cloud Dependent	Cloud Dependent
CODE OBFUSCATION	YES	NO	NO	NO
SECURITY SCORE	98/100	~88-92	~88-92	~88-92

DON'T TRUST. VERIFY.

Integrity Validation Protocol

Command Prompt

```
> certutil -hashfile "Aegis Vault-2.0.0-x64.exe" SHA256
```

```
SHA256 hash of Aegis Vault-2.0.0-x64.exe:  
9e7bf76edba1aa1f0ce214b1a51a0594c31786b2363c  
6614193eb7d7da6644a9
```

```
CertUtil: The command completed successfully.
```

TRANSPARENCY & AUDIT

1. Download the release.
2. Run the command.
3. Compare against published hash.

Source Code: [Available on GitHub](#) for audit.

Logs: Local, tamper-evident AES-256 encrypted logs.

OWN YOUR LICENSE FOREVER

15€

One-Time Payment

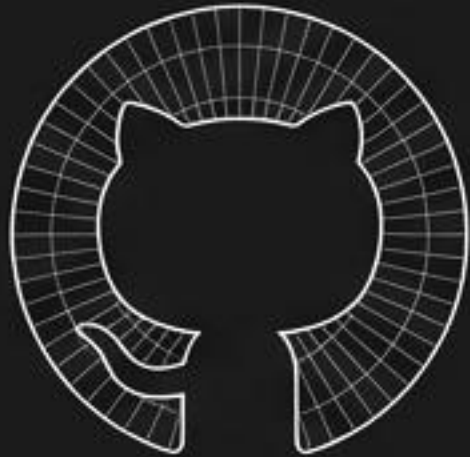

- Lifetime License (v2.x included)
- Unlimited Passwords & Categories
- Portable & Desktop Editions
- Hardened Security Updates

3-DAY FREE TRIAL (Full Features)

Payment Methods: Credit Card / Crypto (TXID Verification for Anonymity).
